1U 19" Cable Brush Organizer

1U 19" Cable Organizer With 5 Hook

Preliminary Description

Cable Organizers are professional products designed for cable management in cabinets in system rooms. These organizers optimize the cable arrangements in the cabin, preventing cable confusion and offering a more functional use.

Technical Specifications

Compatibility and Size
19" 1U Standard: These organizers are 19 inches wide and 1U high and are fully compatible with the cabinet and rack systems in the system rooms.
Hooked Structure: The hooked design ensures that the cables are placed properly, which facilitates cable arrangement and speeds up access.

Material and Structural Durability
Metal Body: It is made using sturdy and durable metal material, which ensures long-term reliability.
Brushed Design: The brushes prevent dust and dirt from entering the cabin at the transition points of the cables and ensure the safe placement of the cables.

Thermal Management and Air Flow
Air Flow Control: The brushed structure regulates the air flow inside the cabinet. By preventing the mixing of hot and cold air flows, it increases the efficiency of cooling systems and ensures more stable operation of equipment.
Thermal Barrier Function: By separating hot/cold air flows, it improves in-cabin temperature control and prevents overheating.

Functional Use
Cable Management: Prevents cable clutter, which provides a more organized and organized cabin interior structure in the system room. This feature offers easier access to cables during system maintenance and updates.
Aesthetic and Tidy Appearance: The brushed design makes the cabin interior look clean and tidy, creating a professional environment.Jul.
These organizations play a critical role in terms of cable management and thermal regulation in the system rooms, contributing to the long service life and trouble-free operation of equipment.
